

We are delighted to invite you to our symposium celebrating the 10th anniversary of the Institute for Outcomes Research at the Medical University of Vienna.

For a decade, our institute has been dedicated to measuring patient-centred outcomes, promoting evidence-based practice, and driving innovation in healthcare. During this time, we have initiated and led numerous international projects, developed innovative solutions for research and care, and explored in depth which aspects of outcome measurement are central to patients, care teams, researchers, experts, and society. At the same time, we celebrate ten years of excellent research and pioneering innovation in musculoskeletal health at the Ludwig Boltzmann Institute for Arthritis and Rehabilitation.

Thanks to the great commitment of our faculty, staff, partners, and supporters, both institutes have evolved into leading centres for outcomes and rehabilitation research across a broad range of disease areas in recent years. We want to celebrate this important milestone together with you.

The symposium will bring distinguished experts, alumni, partners, and friends together for a day of reflection, scientific exchange, and forward-looking discussion. Together, we aim to look back on what has been achieved and develop new perspectives for the years ahead. We would be delighted to welcome you in person at this special event.

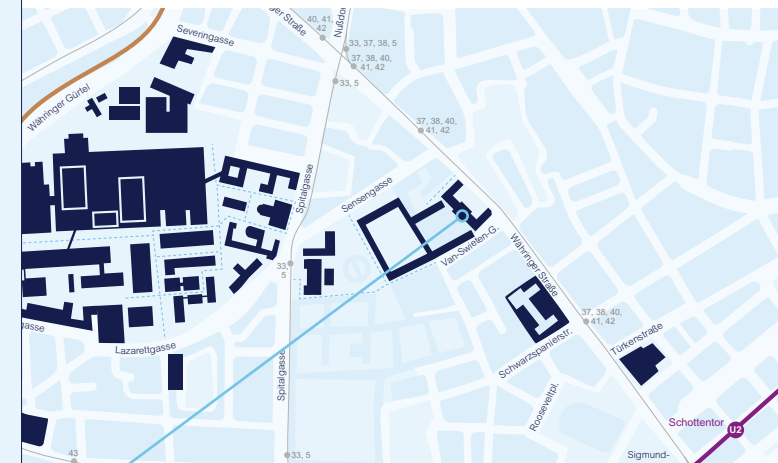

With kind regards,
Tanja Stamm and the teams of the Institute for Outcomes Research and the Ludwig Boltzmann Institute for Arthritis and Rehabilitation
